

Scan App Fair Use Policy

The Scan App's fair usage policy ("FUP") is designed to prevent fraud and abuse of our free trial and associated features. The Scan App's free trial is for individual evaluation purposes only, in accordance with the Scan App terms and policy and this FUP ("Legitimate Use"). The following is a non-exhaustive list of practices that would not be considered Legitimate Use:

- Using the free trial for commercial or promotional operations.
- Automated or bot-driven excessive scanning or data extraction.
- Sharing free trial access between multiple users.
- Unusual usage patterns inconsistent with normal, individual evaluation, for example, excessively rapid or repeated scanning of large volumes of documents.
- Attempting to bypass limitations placed upon the free trial.
- Using the free trial in a manner that negatively impacts the performance or availability of the Scan App for other users.

Other practices may be relevant in determining Legitimate Use, and the Scan App reserves the right to take any unlawful, prohibited, abnormal, or unusual activity into account in making its determination. The Scan App may, at its option, terminate or suspend your access to the free trial and your use of any Scan App features immediately if it determines that you are using the free trial contrary to this FUP.

Free Trial Usage

Subject to this FUP, the Scan App's free trial provides access to a limited set of scanning and data extraction features for the specified trial period. The company reserves the right to change the features accessible during the free trial at any time.
